Testimonials

We believe that there is no better way to convey the quality of our anti-terrorism instructional programs than through the words of our previous students. The following are some opinion statements from a handful of the thousands of students who have received anti-terrorism training from the S2 Safety & Intelligence Institute since 1998.

"I personally give thanks to S2 and CIS for the opportunity to attend the Anti-Terrorism Officer (ATO) training sessions. In all of my travels and training, military and civilian, I rarely have the pleasure of encountering such professional instructors and presentations. The knowledge possessed and demonstrated by the instructor staff sets the bar for all civilian training agencies to follow...The training you are providing to security personnel, military personnel and law enforcement professionals, is unmatched by civilian readiness training for the war on terror."

J. White
Advanced Training Section, U.S. Special Operations Command

"The instructor knew all the subjects like the back of his hand...A+++!"

SMSgt G. Enwright
Office of the Secretary of the Air Force, USAF

"This course is designed extremely well. I have had a few terrorism / anti-terrorism classes, but none have come close to the intensity and historical background as the S2 course. Your course is what every law enforcement officer should be taking."

R. Bast
U.S. Department of Treasury

"I just returned to the Washington area after attending the Terrorism Related Risks course. This email is sent as kudos for a very interesting and informative course that will be of value to me and others that I interact with. Mr. Gundry is an outstanding instructor who displays a deep understanding of his subject, who keeps the interest of the students and created a solid course... Please note, that I am an intelligence and security professional with 40 years of experience in the field. I am currently the principal Analytical Risk Management instructor/facilitator for the DoD Joint Counterintelligence Academy and taught the subject for CIA et al for some four years prior to my stint with DoD. I mention this to emphasize Mr. Gundry's evident expertise in the subject and the fact that old guys like me still have much to learn from others."
